

Create View Order Section Wireframe

author: @nataliavera6

purpose: Layout displays customer orders for staff members to access when preparing meals. It focuses on readability and organization to ensure fast comprehension, mistake-proofing, and order time reduction.

Final product: All pages can be viewed in Wireframes/View Order Wireframe.pdf

Page 1: The “Unread” tab features orders received and unread by staff. Once these orders are viewed by staff and sent to the kitchen, they can be marked as “Opened”. Each order can be tapped to open full order view, shown in page 4.

The wireframe displays a list of six customer orders under the "UNREAD" tab. Each order card includes the order number, customer name, creation date, and a detailed list of items and their specifications.
